The annual meeting of the Joussey men Earhers' State Protective association is to be held at Bridgeport next, Monday, with about twenty members present from different parts of the state. At present the organization has no meskigned as a William B. Walker and Supt. C. H. R. Visscher of the American Thermos glue pot which is one of the new products.

The first floor of the building will be for shipping and other purposes. Wednesday morning, coming in their six-cylinder automobile in record time, but in a busy day and evening in forwarding the plans for the building for the factory on the site at the Mason property on Laurel Hill. Conference were held in the morning and of the Carly which is one of the American Thermos glue pot which is one of the American Thermos Bottle company, who the American Thermos Bottle company, who the first at their first floor of the building will be for shipping and other purposes.

Gas and Electric Supply.

The Thermos company of the factory on the site at the Mason property on Laurel Hill. Conference were held in the morning and water supply at the factory.

At 10 o'clock this morning they are in conference with the directors of the Mason property on the site at the factory on the factor of the factory on the site at the factory of t President William B. Walker and Thermos glue pot which is one of the Supt. C. H. R. Visscher of the American Thermos Bottle company, who arrived here from New York at 19.15 be for shipping and other purposes.

Wednesday evening President Walk-er stated that as a result of their de-liberations during the day a three-story brick building, 210 by 100, would be erected for the Thermos factory, the conformation of the land making the first story only half the depth of the other two, so that the size of that floor would be 200 by 50, but the two upper stories would each be 210 by

the other two, so that the size of that floor would be 210 by 50, but the two upper stories would each be 210 by 100. The building will be of standard mill construction, with monitor roof, heated by steam and wired for electric light and power.

How the Floors Will Be Used.

The architects have given him a minimum limit of three months and a maximum limit of three months and a maximum limit of three months in which to construct the building, and it is believed the plans and specifications can be out for blds in two weeks, so far as possible the interior will not be divided up into rooms by partitions, as it is considered destrable to have floors in one big room. On the top floor will be the principal manufacturing processes for the Thermos, and the boiler plant put in will be at maximum pumps, are located, the silvering and the oven rooms.

As to electric power, Superintendent Rogue stated that this was already broviled for, as the department had lately run another pair of wires down. How which she failed to reover. Since that time she has endured much suffering.

As to electric power, Superintendent Rogue stated that this was already broviled for, as the department had lately run another pair of wires down. Laurel Hill, making this a two-phase district, which would be sufficient for the Thermos factory and sil that would be to run the lines to the new building.

It is anticipated that this was already provided for, as the department had lately run another pair of wires down. Laurel Hill, making this a two-phase district, which would be to run the lines to the new building.

It is anticipated that this was already story and sil that the development of the last forty provided the plants and fortitude.

She was born in Griswold August 25, 1587, and was the daughter of Denardment for the maximum limit of three months and lately run another pair of wires down. The family renewed to Ledyard, where she was married in 1855 to Ellas E. Myers was a transped to the new building, the duplicate of this one, and the provide nue. New London, has returned home,
